

FLAKE Suture

It is ideal for securing closure in soft tissue approach.

The **FLAKE SUTURE** is the best suture to ensure closure in soft tissue approach, thanks to its original tine design that completely eliminates the knot tying step.

Is available in a wide variety of materials and with different suture lengths, it also comes in bidirectional and unidirectional configurations.

PACK

- ✓ Stability Assurance.
- ✓ Peel open.

NEEDLE OF STEEL AISI 302 SERIES

- ✓ Silicone needle, which allows a single pass through the tissues.
- ✓ Designed to keep the edge after several passes.
- ✓ Needle of suitable size for each thread gauge.

THREAD

- ✓ Uniform and homogeneous strand, which prevents tissue damage.
- ✓ High tensile strength.
- ✓ Flexible, facilitates handling and safety in performing the knots.
- ✓ Strand with appropriate length for each type of surgery.

BENEFITS FOR THE PATIENT

- Less tissue reaction and smooth passage through tissue due to the excellent edge and siliconized needles.
- Right concordance in the crimping that generates less trauma in the patient.
